

Assalamu Alaikum WRWB Dear Parents,

Alhamdulillah, everyday has been blessed and productive since we started school. All the students have progressed, and we are pleased to see that they are eager to learn more each day. Last week we emailed report cards, and it was a pleasure to meet parents at the conferences. Your involvement in your child's life is key to their success.

Along with daily academia, we have participated in exciting events like the field trip to Apple Orchard, Prophets Favorite Food, and Mad Science program. We also conducted Fire Drills, Lock Down Drills, and tomorrow Nov 19, we have a Fire Safety Educator giving a presentation to the students iA.

We are thankful to the parents for dropping and picking the kids on time, and we request you to continue to do so. Remember to email all absences short term, long term early dismissal to administrator@nooracademy.org, or call the office. We believe in constant improvements, and if you have any suggestions, please feel free to email them. Thank you for being part of Noor Academy family.

Anjum Sultana

Jun 12	(Fri) - Graduation Ceremony (Tentative 10:30 AM)

Apple Picking Field Trip

This year it was exciting to have the Westview Orchards field trip early in September instead of the cold month of October. The weather was perfect, and everyone appreciated the outside activities. Parents, students, and staff members enjoyed a fun-filled bumpy hayride to pick delicious apples, followed by a treat of donuts and apple cider in the picnic area.

After lunch, the children loved climbing the hay mountain and playing in the play area to their heart's content. Petting farm was a bonus, and students braved to feed the animals with their hands. The staff, parents & students had a memorable time together on the field trip.

Prophet Muhammad ﷺ Favorite Food

In the month of Rabbi-UI-Awwal, our focus is on teaching the students the love for our Prophet ﷺ and inculcating the sunnah in our lives. Every year in this month we introduce healthy foods that our Prophet ﷺ liked to eat. Teachers spoke about the manners of eating, duas for eating, and also talked about the food mentioned in the Quran. Elementary grade students brought beauty to the event by singing lovely nasheeds.

STEM education “Mad Science” sponsored by PTO funds

Your PTO contributions at work!

This year we choose the “Fire and Ice” program; it was an exciting collection of scientific demonstrations. The scientist used dry ice to shower the students with clouds and bubbles, and created a spooky fog.

Students learned about chemical reactions, air pressure and the states of matter.

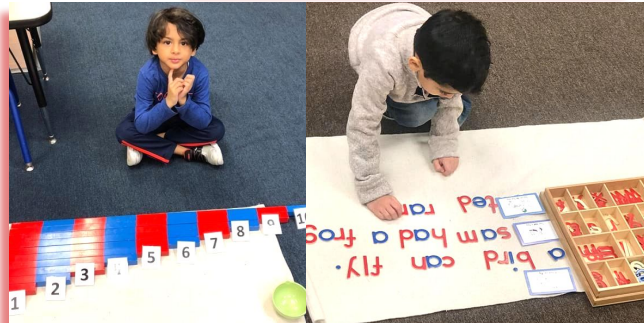

Preschool Class Moments

It is unbelievable to see how our three and four year old students are working hard to become independent and become socially and emotionally strong. Each activity the teacher plans for the day aims at developing a child's language, motor, and cognitive skills.

Elementary Class Moments

Every day, our elementary students accomplish a great deal, not only in Academics but also in Quran and Arabic. The students benefit from hands on learning like the bake sale, experiments, and plant & insect study. Computer time is much awaited time for the students to work on Kids A-Z.

They enjoy art and gym as well.

Daily Dhur Salah is a blessing that our students cherish.
